The Salon Seven Team is excited to introduce

Achieving soft, silky and smooth hair!

The Brazilian Blow Dry Treatment is an innovative process that transforms the hair in its entirety. The treatment is keratin based, keratin is the primary protein of the skin, hair and nails. This natural substance gives hair the ability to return to its original healthy, shiny, smooth state.

Unlike other products available in the market, such as relaxers or the Japanese thermal conditioning, the Keratin Treatment defrizzes the hair without damaging or changing its texture. The treatment can be used on all hair types, including chemically treated hair (coloured, permed, relaxed, highlighted and bleached).

The application process lasts from 1.5 to 4 hours depending on the length and thickness of the hair. After the product is applied, it is sealed with hot irons which traps moisture, hydrates the hair and creates a glossy finish. Results are visible immediately after the treatment is completed, we have been amazed by the outcome!

The results last two to six months, depending on hair type and home care. The treatment will fade progressively as hair is washed. The more you have this treatment the better it becomes.
